REACH regulation (SVHC-list extended in January 2023) mentioned all cables and wires manufactured by ByK Bayern Kabel GmbH

Dear valued customer,

we regularly monitor the REACH regulation and stay in contact with our suppliers. As a fabricator of cables, we are not at the beginning of the value chain, because we do not produce raw materials (ingredients of compounds) and the compounds themselves. We are a link in the medium range of the chain, a so-called “downstream user”. A compulsory registration for ByK Bayern Kabel GmbH itself is not given.

The existing and in January 2021 expanded list of substances of the REACH regulation concerning, we refer to the actual state of our knowledge, that in our cables and wires no SVHC-substances from the ECHA-list⁽¹⁾ respectively occur no concentrations above the permissible limit are included

i.A. Stöckl T.
